Practical and Home Work II

dataset: `culture.dat`

Questions:

1 fit a RM
2 perform Martin-Löf and nonparametric tests to find a homogeneous scale (if applicable, use some split criteria based on raw score or using the variables in the data file)

Home Work

files in `BLOT.zip`

Tasks:

1 perform analyses as for the culture data
2 write a short report (10 pages) on the analyses of the culture and the BLOT data (using all covered tests) and send a PDF by January 9th, 2011)
